

FEATURE

Driving ultimate operational efficiency

Maximise your plant performance and efficiency for increased throughput and reduced costs

Extending the life of key mining systems

In times like these, maximising plant production and operational efficiency is more important than ever before.

As a leading supplier of products and services designed to extend the life and increase the availability of key mining systems and equipment, now more than ever we recognise the importance of our role in providing expert products and services that drive ultimate operational efficiency across our customers' plants.

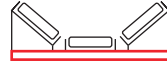

As a global company, we utilise our extensive manufacturing and supply chain network as well as our knowledge and expertise, to provide proven and trusted solutions for some of the world's largest mining companies.

Wear protection linings and coatings

We offer a range of wear protection solutions including rubber linings, heavy-duty rubber linings, anti-caking solutions, adhesives, screen mats and mill linings that extend the service life of your equipment and ensure that it remains in service for longer, therefore increasing throughput and volume.

Our premium range of products have been rigorously tested by dedicated research, analysis and innovation teams that are focused on continual improvement and ensuring that products perform beyond their requirements.

Total conveyor management solutions

As a critical part of any plant, the operational efficiency of conveyor systems is essential. Our range of premium conveyor belting, conveyor components and experienced conveyor engineering experts, treat conveyors like an integrated system to keep them up and running for longer.

From feeding, cleaning and skirting systems through to rollers, frames, idlers and pulleys, our high quality products coupled with expert maintenance and repair capabilities help keep mining operations on the move.

Innovative technologies and global service expertise

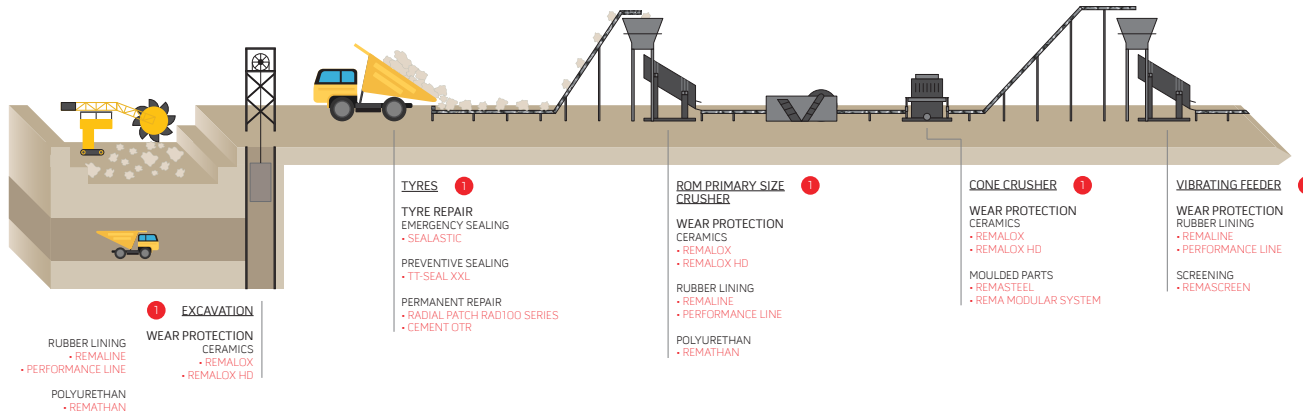

When paired with innovative technologies such as radar-based scanning, digital modelling, cloud-based reporting and analytics, we offer our customers a range of tools to ensure operational efficiency across their entire plant.

In addition, our highly skilled, trained and dedicated on-site, project and engineering teams utilise their specialist skills to ensure that plants remain up and running twenty-four hours a day, drawing on global knowledge and expertise to provide only the best service.

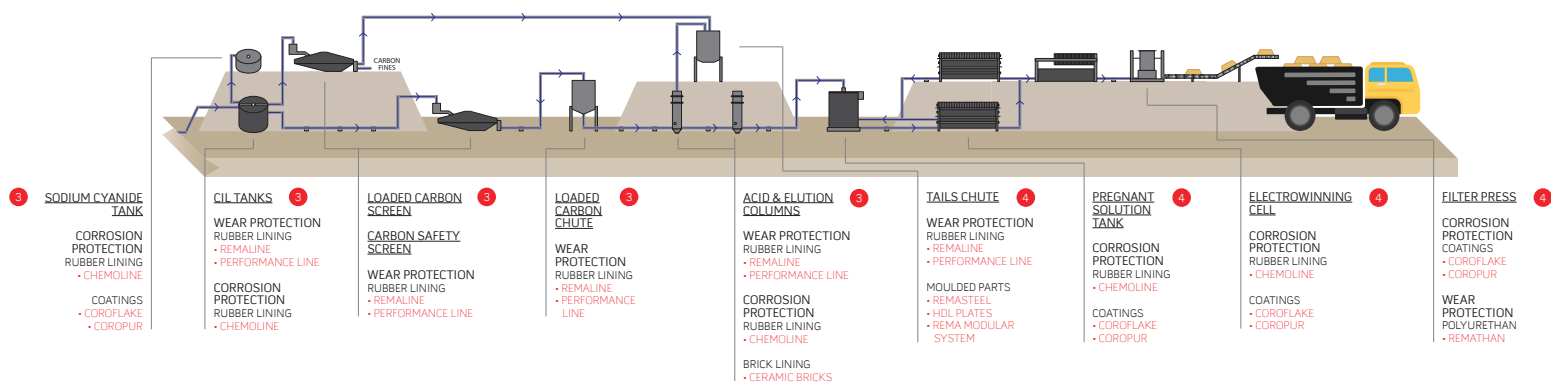

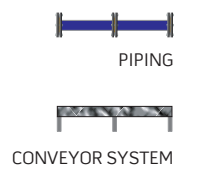

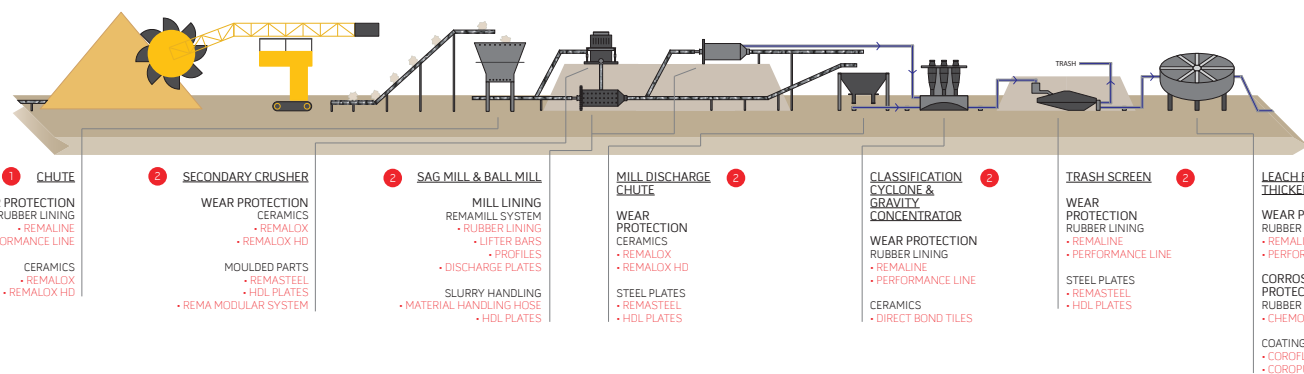

Products & services for the entire mining process value chain

as exemplified in gold processing

- 1 PRODUCTION FEED**
PRODUCTS & SOLUTIONS
- 2 MILLING & SCREENING**
PRODUCTS & SOLUTIONS
- 3 GOLD LEACHING**
PRODUCTS & SOLUTIONS
- 4 REFINING**
PRODUCTS & SOLUTIONS

Case study

Increasing throughput and reducing maintenance costs

At a gold plant of one of our customers in Western Australia, the installation of our REMA Modular System wear protection lining saw throughput increase significantly as a result of wear elimination.

After conducting a thorough inspection of plant equipment on the customers' site, our teams recommended the installation of our REMA Modular System wear protection lining.

Offering flexibility in both size and application, the lining was quickly and efficiently able to be applied to a range of the customers' plant equipment.

Due to the product's highly wear resistant nature, its implementation has seen the complete elimination of wear in plant equipment, therefore significantly reducing maintenance costs for the customers and increasing throughput.

Industrial Solutions

Known for our extensive experience providing leading conveyor maintenance solutions in the mining industry, we're now taking the next step to drive operational efficiency in a range of industries around the world, utilising our wealth of experience and proven products and services.

From construction, quarrying, food processing, water treatment and more, our Industrial Solutions provide plant operators across a range of industries an extensive range of proven products and services tailored to the specific needs of their individual plant.

Our range of wear protection, conveying solutions and innovative technologies provide plant operators with the means necessary to drive performance, maximise site productivity, increase throughput and reduce costs.

Take the next step...

Drive ultimate operational efficiency.

Speak to our sales team today to discover how our products and services can drive your plant performance.
