

// ONE BRAND // ONE SOURCE // ONE SYSTEM

REMA TIP TOP MACKAY

REMA TIP TOP Mackay is uniquely positioned to service the Bown Basin and surrounding areas. Our range of wear protection, conveying solutions and technologies, surface protection products and 24-hour service model increases your throughput potential, by reducing downtime and improving plant availability.

ABOUT US

REMA TIP TOP was founded in 1927 as a rubber manufacturing company. For almost a century, Rema Tip Top has focused on innovation and technological developments taking the company's capabilities far beyond rubber manufacturing. Rema Tip Top products are used across the globe to extend the service life and reduce maintenance costs of its customers' assets.

For Australian industry, we provide products, services and project management for Australia's major mining houses, OEMs, EPCMs, and other organisations and suppliers across most industries. From specialist rubber lining, wear and corrosion protection, to total conveyor maintenance, management and product supply, we are a global market leader in products and services for materials processing and surface protection.

In Australia, Rema Tip Top has more than 500 employees, including a services network of more than 400 personnel operating out of strategically located hubs around the country.

In addition to our on-site service capability, Rema Tip Top operates dedicated rubber lining workshops in Perth, Brisbane, and key locations across Australia. Each facility is equipped with purpose-built infrastructure and staffed by experienced technicians committed to delivering high-quality, wear-resistant lining solutions for a wide range of industrial components.

We've worked with a range of industry leaders around the world to deliver innovative, best-in-class bulk materials handling solutions. Our experience is unmatched, as is our commitment to safely delivering projects that are efficient and value aligned with our clients.

REMA TIP TOP MACKAY

Our crews operate 24 hours a day, 7 days a week - that means you never have to handle shutdowns or unplanned downtime without the full support of our maintenance team.

We're experts in providing end-to-end solutions, including but not limited to:

- Conveyor belt replacement
- Splicing and repairs (for surface and underground)
- Conveyor belt and pulley refurbishment
- Pulley replacement & relagging
- Skirting replacement & upgrades
- Belt cleaner installation & maintenance
- Idler & frame replacement

We have a wealth of experience supporting the Bowen Basin's largest coal mines, quarries and port services. We're always here to support Mackay's local industry operations to become more efficient than ever.

ENGINEERED BELTING FOR QUEENSLAND COAL

Conveyor systems are a critical part of any plant. We treat your conveyors like an integrated system supplying premium products, advanced monitoring and analytics tools and experienced conveyor engineering experts to keep you moving.

REMA TIP TOP has conveyor belt production facilities in Europe, South Africa and China, including Dunlop Belting Products South Africa. Our product range includes fabric ply, steel cord and solid woven belts, manufactured to suit a large range of applications and to Australian specifications including FRAS. REMA TIP TOP is also one of the largest stockists of conveyor belt in Australia with a large portion held locally in Mackay.

FIRE RESISTANT AND ANTI-STATIC (FRAS)

REMA TIP TOP Mackay stocks a range of FRAS conveyor belting, perfectly equipped to handle the demands of the Queensland coal market. This includes Rema Tip Top's Flame Tech range of PVG belt which is specifically designed for use in underground Coal. All of REMA TIP TOP's FRAS rated belting undergoes stringent QC testing and meets the required standards.

M-GRADE WEARTECH

REMA TIP TOP's WEARTECH belt has an M-Grade cover, internationally recognised as a general purpose compound with superior tensile strength. M-Grade is highly resistant to cuts, gouges and abrasion. The combination of tensile strength, abrasion resistance and elasticity of the conveyor cover are chosen to best suit the application in a range of cover types. DBP covers are in a league of their own when it comes to matching the life to the application.

Belt Conveyor Products

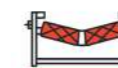

Belt cleaners

Adhesives

Idlers, rollers & frames

REMATrack

Pulleys & pulley lagging

REMA TIP TOP Mackay has over 22 service personnel. The team is comprised of 13 belt splicers, fitters, boilermakers and electricians to ensure we are always fully staffed for scheduled maintenance and unexpected downtime.

Belt Refurbishment

Refurbishing used belting can drastically reduce belt purchase costs, particularly in underground environments where belt usage windows can be as little as 12 months.

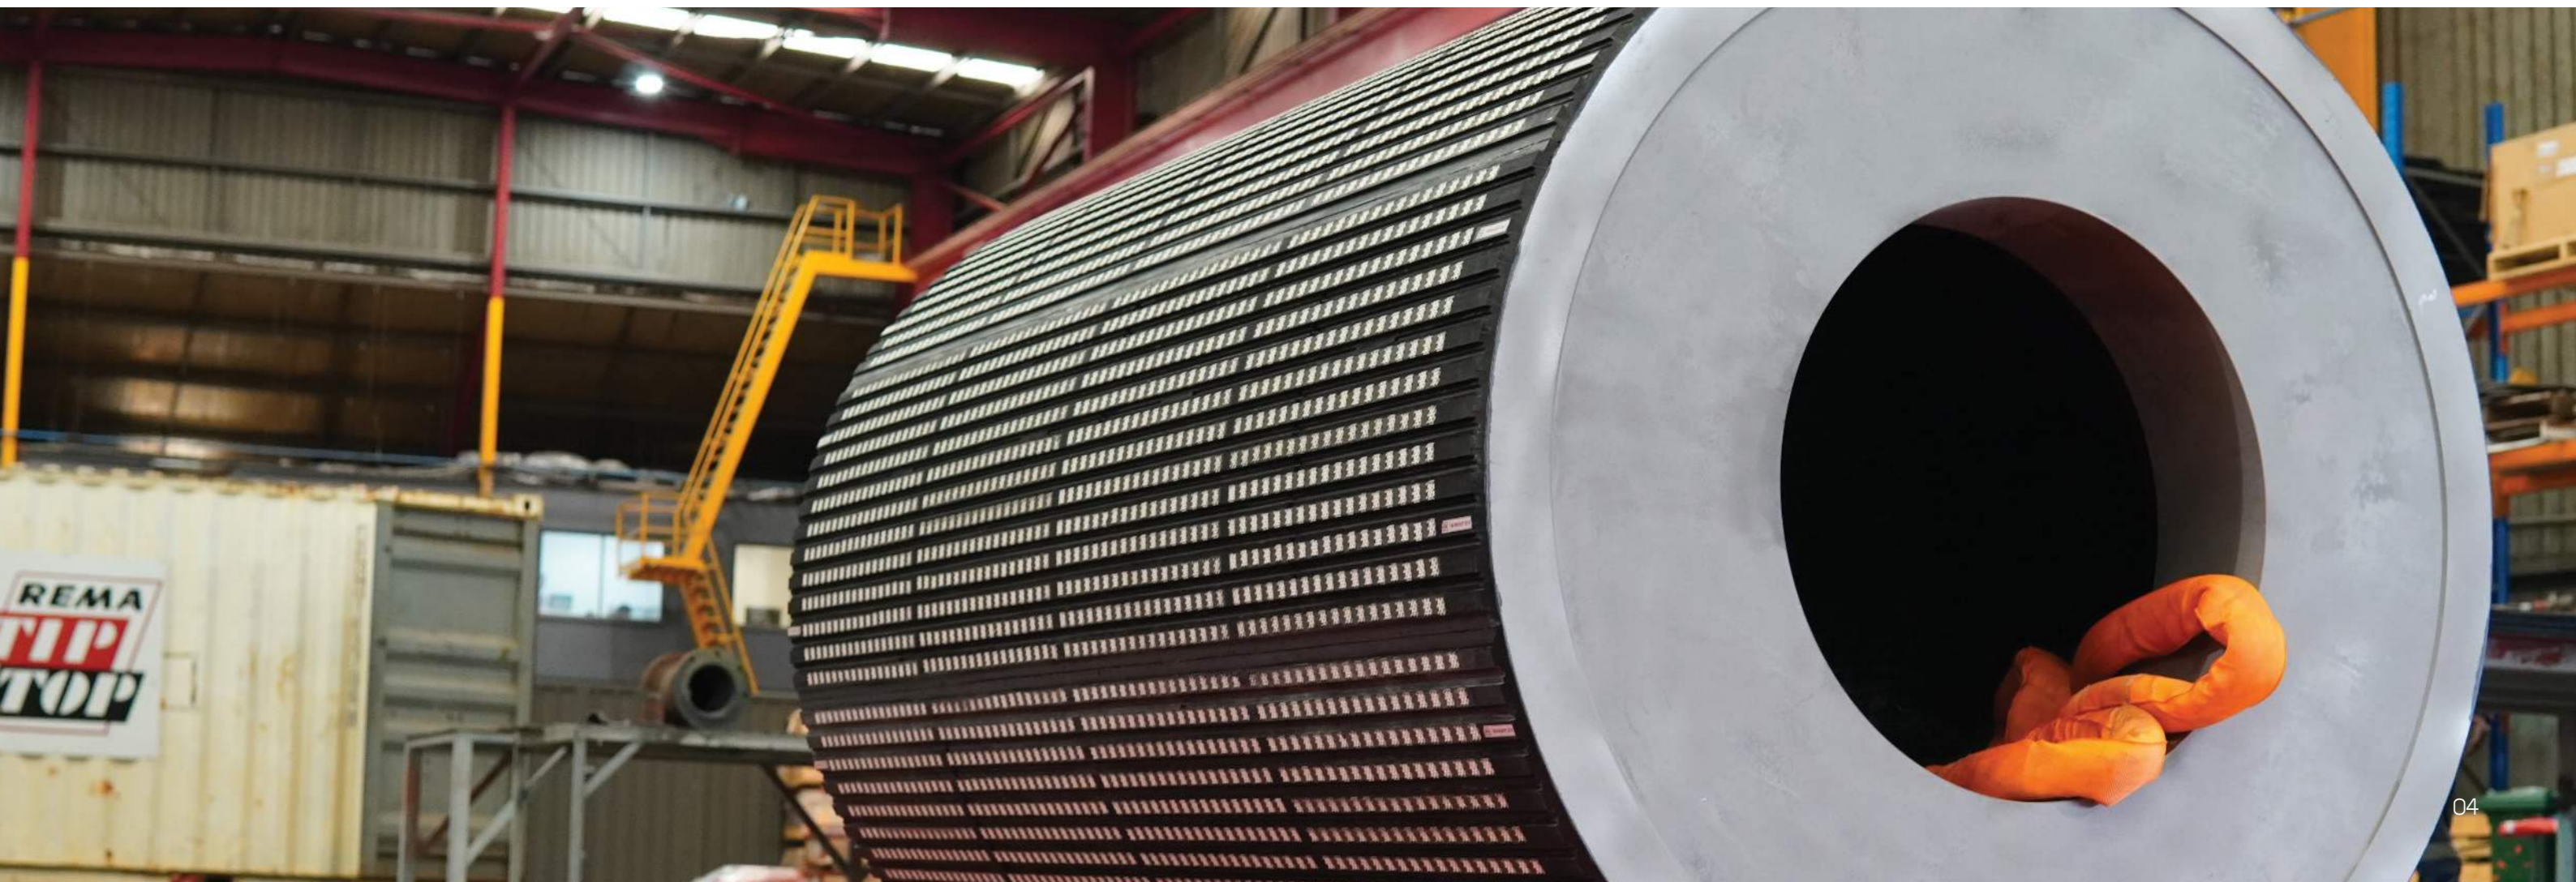

Rema Tip Top can provide a second life for your belting, providing an opportunity to get more value from each purchase. Used belt undergoes an initial mapping process, whereby repairable belt is distinguished from unusable belt. The reusable belt is repaired and spliced together to make the desired length. Mechanical clips are installed either end, the belt is wrapped for storage and transported back to site ready for reinstallation.

The refurbishment process, belt grade, length & clip type can all be tailored to specific site requirements. On top of significant cost savings, belt refurbishment can reduce lead times to as little as a few days.

Pulley Refurbishment

Refurbishing an existing pulley means reduced lead times and cost without sacrificing reliability.

- Strip, inspect and re-lag to specification
- Comprehensive post strip assessment & report
- Root cause failure analysis
- Shell & shaft machining
- Non-destructive testing
- Modification & upgrade options
- Tailored solutions for specific environments
- A range of lagging options
- Painting
- Transport & storage frames
- Stringent QC processes & reporting
- Rationalisation support to reduce inventory requirement
- New pulleys should the refurbishment costs prove uneconomical

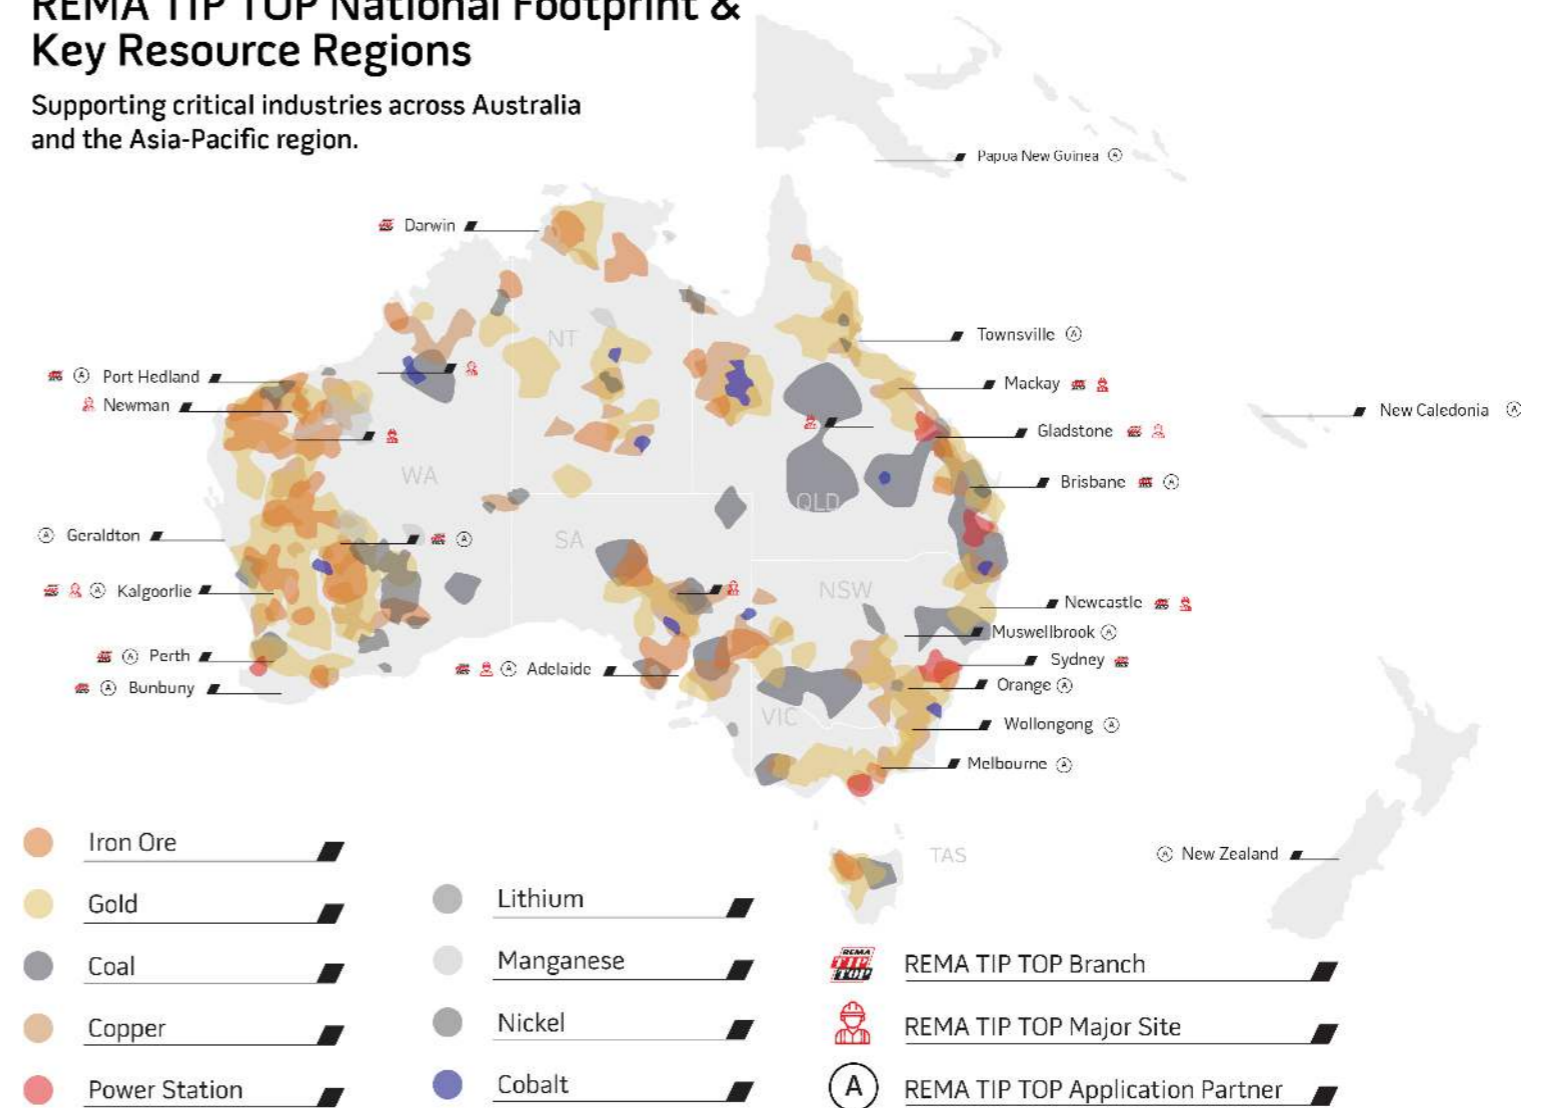

Right across Australia we work with our customers to extend the service life of their plants and reduce maintenance costs

From mining in coal, iron ore and minerals to energy generation, we offer products and services across the entire value chain to maximise productivity, efficiency and profitability.

REMA TIP TOP National Footprint & Key Resource Regions

Supporting critical industries across Australia and the Asia-Pacific region.

Keeping Your Assets Safely in Motion

OUR VALUES

We work collaboratively with our customers to build relationships that are value aligned, while working in some of the most challenging environments on the planet.

We're constantly pushing the boundaries to innovate, advocate and to ensure that our people can safely deliver sustainable business operations today and into the future.

At the heart of our work are the values that guide how we operate: Respect, MateSafe, Equality, and Accountability. These principles shape our culture, drive our decisions, and define how we work with one another and with our clients.

Respect

We treat everyone with consideration and appreciation, valuing diverse perspectives and contributions. Respect is the foundation of how we interact with colleagues, clients, and the broader community.

MateSafe

We prioritise safety and well-being, ensuring that every team member operates in a secure and supportive environment. Our MateSafe initiative reinforces a strong safety culture where looking out for each other is second nature.

Equality

We ensure equal rights and opportunities for all, creating an inclusive environment where every individual is valued, heard, and empowered to succeed.

Accountability

We take responsibility for our actions and outcomes, upholding the highest standards in everything we do. Accountability drives our commitment to excellence, trust, and reliability.
